3M anti-tarnish paper; tabs, strips, shapes and more.

What is 3M anti-tarnish paper?

It is a special absorbent paper that incorporates 3M Tarni-Shield technology. This technology is designed to inhibit tarnish or discoloration of metals in transit or storage. They protect jewelry, flatware, serving pieces, musical instruments, trophies and other items. Strips and tabs protect silver, nickel, copper, bronze, brass, tin, pewter and gold.

How does 3M anti-tarnish paper work?

When exposed to surrounding airspace the activated sites immediately go to work scavenging corrosive agents such as hydrogen sulfide (main tarnish causing agent), sulfur dioxide, nitrogen dioxide (a secondary pollutant of photo-chemical smog, also produced in combustion process), ozone, hydrogen, chloride and chlorine and organic carboxylic acid.

How much 3M anti-tarnish paper do I need?

The amount of 3M anti-tarnish paper is dependent on the size of storage space and the amount of silver/metal to protect. For example a 3x3x3 inch box (about 30 cubic inches) would need one 1x1 inch tab. A 10x10x4 inch box (about 400+ cubic inches) would use one 2x7 inch strip.

How long will 3M anti-tarnish paper protect?

Length of time depends on permeability of the storage or shipping container and the pollution level of the surrounding atmosphere. These estimates may vary based on location.

A. Loosely sealed container (Cardboard box)	6 months
B. Moderately tight seal (flap top bag)	12 months
C. Tightly Sealed (zip-lock bag)	24 months

Is 3M anti-tarnish paper safe?

This product, when used under reasonable conditions and in accordance with the 3M directions for use, should not present a health hazard. However, use or processing of the product in a manner not in accordance with the product's directions for use may affect the performance of the product and may present potential health and safety hazards.

Basic Instructions:

Remove the 3M Anti-Tarnish Tabs from container and place them near polished metal in an enclosed area. Use tabs in jewelry cases, storage bags or boxes, china cabinets, silverware chests, musical instrument cases or trophy cases. One tab protects 30 cubic inches of air space. Store unused paper in a sealed, airtight bag.

3M anti-tarnish paper standard sizes:

Tabs: 1x1 inch, 100, 500, 1,000 & 3,000 qty.
Tabs: 2x2 inch 25, 100, 500, 1000 qty.
Strips: 2x7 inch. 25, 100, 1,000 qty.
Sheets: 8x11 inch 25, 100 qty.
Roll: 1inch x 1,000 yards.
Custom sizes, quantity and packaging available.
